From: A: Since Autocad is now an annual subscription product Autocad activation is no longer included as part of the free version. This link shows the change in licensing - The main points are - Autocad 2016 is a subscription product for a fee Users of free Autocad can be upgraded to an Autocad 2016 subscription for 1 year at a cost of \$2600 USD Users of Autocad 2015 can be upgraded to an Autocad 2015 subscription for 1 year at a cost of \$100 USD The activation key does not work with new versions of Autocad. Autocad 2014 users can only install the latest update and use the license key from that version. A: I just found this link, the same link was mentioned by @kevin, except he also mentioned the activation key. The difference is that he mentions a problem with previous version of autocad (2013) where the activation key would work but when the new version was installed, it would not work anymore and you would have to create a new user account and key. I just installed a new version of autocad 2016 on my machine and it worked perfectly. I hope it helps Q: Why is adding range to enum value needed in C#?
