**CRMworx Crack [Win/Mac] Latest**

[Download](#)

**Download**

CRMworx Cracked Version is a robust contact manager and quote/proposal creation tool. Contact activities may be recorded and tracked with the Clients and Prospect modules. The Contact records of Individual representatives or Account Managers may be isolated or filtered by User Login and by Work Groups. CRMworx provides an easy and simple way to import contact records and/or item records from

---

common business applications like QuickBooks, Microsoft Outlook, Google's Gmail, and many other applications that can export to a standard.csv text file. CRMworx can perform powerful mail merge and database sorting functions without an external word processor or spreadsheet. Therefore, using the CRMworx Report Builder you can create and print a wide variety of documents, labels and reports. Give CRMworx a try to see how useful it can be for managing your business!

**CRMworx Features: Data Filters:**

---

Filter contacts by name, email address, phone number, email address, and phone number. Create Filter Rules Filter out contacts by matching multiple email addresses with your rules. Use multiple rules for each filter Import/Export Contacts Import your contacts from standard.csv or Microsoft Excel (.xls) files. Export contacts to standard.csv or Microsoft Excel (.xls) files. Contact List/Tree View View contacts in a tree view Use the tree view to add contacts to different lists or work groups. View

---

contact records individually, by work group, by user, by company, by status, by activity, by status or by account group. View Contact Data Grid View contacts by name, email address, phone number, company, status, and area Quick Quotes/Proposals Create easy to read and use letters/quotes/proposals. View the quote/proposal details in a data grid. Drag and Drop Contact List Filters Create a new filter by dragging and dropping contacts into a list of contacts. Filter by Name Filter by

---

email address, phone number, or status. Filter by a specific contact. Add contacts to lists or work groups based on a given set of conditions

**Search by Name** Create a contact search by using the name. **Search by Phone Number** Search contacts by phone number. **Search by email address** Search contacts by email address. **Create Custom Work Groups** Create a contact list based on a set of custom conditions. **Create a work group by searching contacts**

---
