## OfficeClip Enterprise

KeyMacro allows you to easily automate the creation of SharePoint workflows. Developers can also use the same macros in other Microsoft applications such as Microsoft Visual Studio or Microsoft Visual Studio 2010. Macros allow you to create a new process for common tasks in an application. Macros can be used to add files and folders, modify information, insert data into cells or edit contents. KeyMacro comes with two types of templates: simple and complex. The simple templates have the possibility of inserting the data directly into the document body, and more complex macros may allow you to connect multiple activities together. The complex macros can be used to: KeyMacro also includes the ability to share macros with users. To add users to a macro, you must first add them to a security group and give them the appropriate rights. The macros can be distributed to users via email, or published to a website. KeyMacro runs on any platform that has Microsoft.Net Framework and Microsoft SharePoint Services installed. KeyMacro is the easiest way to design and automate Microsoft Office 2010 workflows in SharePoint. The macros provide you with the ability to: Capture information in Excel 2010 Workbooks Send E-Mail and Email-HTML Publish information to web pages or SharePoint document library Record events in SharePoint Merge text files from different folders into one file Record activity with Excel 2010 Power Query Import or export data from a SQL Server Create Web Parts in SharePoint Add or remove fields from a Web Part page Automate the creation of SharePoint workflows Save a list of macros into a template And much more... KeyMacro can be used in any.Net programming language and supports Microsoft Office 2000, Microsoft Office XP/2003, Microsoft Office 2007, Microsoft Office 2010 and SQL Server. The library is multi-language and can be used in English and Spanish. KeyMacro is the only application that can be installed and run from your computer. You can easily distribute macros to users, including through emails. Also, KeyMacro includes the option to create Web Parts for SharePoint. The templates include various possibilities to display data in different formats, such as Web Parts, charts and graphs, documents, and forms. KeyMacro can be used on any platform with any language, including: C# with Visual Studio 2008 or Visual Studio 2010 VB with 1d6a3396d6
