What's new in CINERIS SOMNIA - Original Soundtrack:

Story: Queer Fiction & Hybrid Efforts Queer recently has now become the attempt to make visible all of our stories. Currently, the largest literary movement in the world is #LGBTQIAAPIA, or emerging from the LGBTQ+ community itself is queer to describe the whole gamut of gender expression, sexuality, race, class, ability, and gender identity. We're coming together, just as we've been told we had to for a long time: despite living in silos, fighting wars, and being forced to hide our truth in simple black and white terms, we're finally forming a unified front to change the world. And as such, the cries of a newly emboldened generation have created a true revolution of a new kind - the art of queer storytelling. In the past, the queer experience has been met with whispers, half-truths, and mislabeled as well as in self-contradictory books, in films and other pop media offerings. We've all been told that having a narrator that's gay, or at least about to become gay, is not the right way to tell a story. We've all been told that characters can't be gay, or that it doesn't really matter, or that we should just accept our stories as they are. We've all been told that it's (still) better for queer people to conceal their identities, that we should stay silent, take the abuse, and that we should disappear. Then, the queer coming out stories started to flood the world, and brave and open people like Edie Falco and Justine Skye came out as ourselves in the 90s, too, to make the world understand what it is to be queer. It seems that the telling of queer stories is also the genesis of a new form of literature - hybrid stories. Contemporary fiction has been stripped of the old attempts to present straight people with the, let's face it, often very heteronormative lens of queer fictions. The intersectionality of race and gender were overlooked in favor of the traditionally white masculinity of white cisgender women and white cisgender men. Scholars and critics of the past used to measure the writing of writers and their contributions to society with the standards set by they themselves, often with a single story, without these two modern youth, minorities, or minorities with problematic experiences added into the mix. The straight

VVVV: Online is a retro-inspired sandbox side-scroller, with a deadly twist: find & craft weapons to fight back against giant bosses, brutal undead spiders, and a dark lord. Rummage through a gigantic sandbox world full of mysteries, secrets, and danger. Discover the source of an ancient plague that has spread across the wastelands of VVVV: Online, but there's no time to waste: you need to stop the dark lord before it's too late! VVVV: Online has a special cooperative multiplayer mode: "PvEg". Choose from the three starter characters: vampire, cowboy, & witch, and go out into the wilderness to complete all challenges in order to unlock a host of equipment, weapons, & magical wands. Craft your own weapons from a wide selection of materials. Once you've decided which enemy you want to attack, you switch to the attack mode and initiate your attack with each keystroke. VVVV: Online offers a unique crafting system in which you can find & craft new equipment, weapons, & magical wands. Equip your crew with the right gear, and they can help you out when fighting back against the undead & giant bosses. If you aren't sure what to equip your crew with, find weapons and armors that are similar to your current equipment, and choose a weapon type that complements your current build. VVVV: Online features the first single-player campaign in its new 8-bit incarnation: "Blister in the Sun." Play solo or with friends by jumping into an arena and fighting your way through massive waves of mobs, bosses, & end bosses. VVVV: Online features two new gameplay modes: "Warzone" & "Collector's Edition". (The "Collector's Edition" includes the Campaign, Arena, Boss Battle, Blister in the Sun, and all new music tracks.) You can join a friend's game to play the "Collector's Edition". You can also join someone's local "Warzone" match on any server. (Only one person can be the host in the "Warzone" match.) Set your difficulty level between Normal, Hard, and Hardcore. Choose the "Free
