All the qualities of DRAGON QUEST X The game is full of new and exciting elements that have yet to be seen in a video game and is undoubtedly a fun multiplayer RPG, while the online capabilities are being incorporated. The game is full of new and exciting elements that have yet to be seen in a video game and is undoubtedly a fun multiplayer RPG, while the online capabilities are being incorporated. There is also a charming story that wraps everything up into one grand package. Your overall sense of a solid production has been achieved. Characters can be freely and beautifully customized, and the game is both joyful and full of surprises. Review from Blog Up This is the best game in the RPG genre EVER!!! Review from PSX Alpha This game is the best RPG I've ever played!! I was skeptical when I heard of the game, thinking that it was yet another standard fantasy game, but it really exceeded all my expectations. The graphics are dazzling and the music fits perfectly into the situations the game was portraying. The settings are nicely designed as well and the characters really have a soul. Downloading the demo version made me feel like I was in the pits of a dungeon. Of course, that also helps if you are a beginner, but it is also quite the opposite. With this kind of atmosphere, your character will be determined to succeed no matter what. The gameplay was entertaining and challenging, and the battles have an awesome feeling to them. It's just as fun to watch your character die as it is to become stronger. The characters are amazing and really manage to capture your interest. Their personalities are also shown well, even though some of the dialogue is not really appropriate for children. The story is a very grand one and wraps up everything nicely, which is great! The individual parts of this game are all magnificent, so I would definitely recommend it. The only thing I would change is that the character design has a bit of a bland feel to it, but that's my only criticism. If you are a fan of the RPG genre, this is the game for you. Give it a try before it's too late! Review from PSX Alpha This is the best RPG I've ever played!! I was skeptical when I heard of the game, thinking that it was yet another standard fantasy game, but it really exceeded all my expectations. Anyway, bye!Q: How to implement ListView in Android Studio? I'm currently working on an Android project. I want to implement a ListView in my screen. There are two editText in screen as shown in image below. The first editText is "Inventory Name" and second editText is "Inventory Value" So the first editText should contain the current time and the second editText should contain the value that is entered at that moment. For example, If I click the screen now it should show "02/10/2014 12:23:23" at first editText. Also the second editText should contain the value of the moment. For example, In the above image, if I click now second editText value should display 20. How to implement this kind of data in my android project? I'm not sure how to initiate the data. A: I usually use this public class MainActivity

```
extends Activity { EditText editText1,editText2; @Override
protected void onCreate(Bundle savedInstanceState) {
super.onCreate(savedInstanceState);
setContentView(R.layout.activity_main); editText1 = (EditText)
findViewById(R.id.editText1); editText2 = (EditText)
findViewById(R.id.editText2);
updateTextView(editText1.getText().toString()); } public void
updateTextView(String text) { if (TextUtils.isEmpty(text))
editText2.setText(""); else
```
