Elden Ring game UI

Supporting the game UI and World Map GUI, we have now opened our initiative to create a User Interface that comes to life thanks to our artist partners.

The Elden Ring UI fits into 4 themes:

1) Soul of a Tragic but Dazzling Fantasy The main character in the game has supposedly gone to an unknown world full of temptation and chaos. However, you are able to experience a completely different adventure as a hero who was once a weak and defenseless person, have faith in fate, and pursue the road that promises to lead you forward.

2) A World of the Spirit and Wonder A deserted continent full of mysterious islands is now awash with light and all is in motion. Encountering many opportunities to go on adventures, build up yourself, and come into conflict with the enemies, you are sure to enjoy yourself in the world of the Elden Ring. There's nothing to fear... not even adventure!

3) A World Full of Skilled and Talented Craftsmen As a highly skilled technique, you create your own

Combat operations are absurd, the background music is terrible, the difficulty is definitely the most complicated and it's just easy to play around without any challenges. Also, there's no fun to it. The enemies are usually insanely powerful and the standard gear just falls apart after a while. Hence, the game has no point. Also, it is really boring. And it's frustrating. The average player will cry. Technically, it is no point.
